

p_manage_21 in the HOL library?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

We've had a request to make a couple of global changes against our holdings library (for instance, changing the first indicator of 852 field from 0 to 1). Is it possible to run p_manage_21 in the HOL library?

Resolution:

[From Christine Moulen, MIT on ALEPH-NA:]

It's certainly possible. p_manage_21 changes the doc records from any library. The trick can be identifying which holding records you need to change if you don't have any xxx60 indexes.

I usually end up doing p_ret_01 (which takes hours), or p_print_03 and grep for the records/lines containing the tag I'm interested in.
