

## Lending Requester id values not appearing

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

When creating a new Lending request using the input form, the "Requester ID" drop down box only shows approx. 360 of 2000 partner records.

### Resolution:

This problem has been corrected in Aleph 20. In Aleph 18, although not all suppliers are displayed in the list, supplier's code can be entered manually and system recognizes it and request will be submitted. Please use this workflow as a workaround until you upgrade to Aleph 20.
