Description:

I found a bug in hold_request_slip_end. \$03900 should be z37-end-request-date, but in the program you call date_edit with Z37-END-HOLD-DATE, it should be Z37-END-REQUEST-DATE.

Resolution:

I agree.

The form says "request date" "end_request_date" - it is obvious from the context that the user will expect z37_end_request_date there rather than z37_end_hold_date. When the slip is printed the request is most likely not fulfilled so the z37_end_hold_date would be empty anyway

Additional Information

hold request date, z37_end_hold_date
