
Adding subfields to pc_tab_short.eng

- **Article Type:** General

Description:

Is it possible to add multiple subfields to a listing in pc_tab_short.eng?

Catalogers here would like subfields b,n, and p added to the title (245) field in the brief lists, but the table looks like it's only got space for one subfield.

Resolution:

As noted in KB's 4884 and 5293, the edit_field.eng format "S" ID's are involved in this....

Your abc01 edit_field.eng currently has this:

```
1 # 245## S
2 a
2 k
```

I suggest that you change it to:

```
1 # 245## S
2 a A ^
2 b A ^
2 k A ^
2 n A ^
2 p A ^
```

and restart the pc_server.

See KB 5446 for adding subfields to the GUI Browse "LC Call No. + Location" Title column (-- which comes from the z13).
