Question

How to bypass the login screen of the OPAC?

Answer

1. In \$alephe_root/www_f_lng, save "login" page as "login.orig":

```
cp -p login login.orig
```

2. copy the name of the desired default initial page ("basic") to "login" and it will appear as the default page:

```
cp basic login
```

In the original login page, message 9863 displays: "ID / barcode and verification are not case sensitive."
After change to default page "basic", this message still displays.

Change message 9863 in \$alephe_root/error_eng/www_f_heading:

1. Save the original copy: `cp www_f_heading www_f_heading.orig`

2. Change the line

```
"9863 L ID / barcode and verification are not case sensitive."
```

```
to
```

```
"9863 L Welcome to our library catalog. Please sign in to view your personal account."
```

Additional Information

If you don't want any message to display, you can modify the head file.
