

Empty table: tab_system_status

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

When looking at any of the run files in data scratch for our 01, 50 or 10 libraries, we find the line:

Info: Empty table /exlibris/aleph/u18_1/alephe/tab/tab_system_status

Info: Empty table /exlibris/aleph/u18_1/alephe/tab/tab_system_status

Info: Empty table /exlibris/aleph/u18_1/alephe/tab/tab_system_status

Info: Empty table /exlibris/aleph/u18_1/alephe/tab/tab_system_status

Info: Empty table /exlibris/aleph/u18_1/alephe/tab/tab_system_status

I tried util/w/5 to see the system status and receive no reply.

Resolution:

We corrected this by copying the /exlibris/aleph/a18_1/alephe.orig/tab/tab_system_status to \$alephe_tab/tab_system_status.
