

## p\_item\_05 call number order

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

Even though we selected LC Classification as Call No. Type, when we run p\_item\_05, the results are not in LC call number order. Is there a way to generate a true shelf list-order list by LC call number?

### Resolution:

You need to run p\_item\_06 to populate the z30\_call\_no\_key fields
