
How can we get rid of the default patron (cartoon) picture?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 17.01
-

Description:

How can we replace the default patron picture that is supplied with V17?

We are not using this feature, but do not like the cartoon.

Resolution:

The default picture can be found in the \$usr_library/bor_pics directory, as "default_picture.jpg".

I've currently changed it to a white image. You can adjust it as you desire.
