

## p\_acq\_03: include bib system number in output?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

Print acquisition records (acq-03) displays many fields but not the abc01 bibliographic system number. I need bibsys numbers to use with p\_manage\_21.

### Resolution:

The p\_acq\_03 output includes the ADM number.

The p\_manage\_70 service can be used to convert a file of ADM numbers into the corresponding bib numbers.
