
Author not displaying in Full display

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Though the author displays OK in the Standard (Full) display in the xxx01 database, it does **not** display in the xxx30 Course OPAC standard records.

This happens with regular records, electronic records, personal items.

The "MARC" (MARC tags) format **does** display the author field.

Resolution:

The line preceding the `## 1#### ...` line in the xxx0 edit_doc_999.eng was:

```
## DIS
```

Changing it to:

```
## DIS D L Y E
```

and restarting the www_server corrected the problem.
