

p_ret_01 Strips Non-Filing Characters

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Can you tell us why those 3 records below are not found with p_ret_01 service?

000351999ABC01

000352000ABC01

000352225ABC01

Resolution:

The "Retrieve Catalog records" service (p-ret-01) strips the non-filing characters, according to the non-filing indicator set in tab01.<Ing>.

If you're looking for "Text from" / "Text to" in field 245, for example, the text should not include the non-filing characters.
