

Cannot see budgets in Acquisitions

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 20, 21, 22, 23

Description:

When we try to view budgets in the acq application, nothing shows up in the list. I have set my permissions to all sub-functions in acq (for abc50), Budget Maintenance All Sub-functions, and Budget Usage all three items checked.

User A gets the budgets while User B does not.

We have tried proxy-ing USERB to USERA in the Staff Privileges - Access Rights, but that does not help.

Resolution:

Looking at the pc_server_6991.log, I find that while both USERA and USERB start with a C0116 program (Get Budget List), USERA progresses to a C0126 (List of Transactions of a Budget), while USERB does not.

Make sure that the budget filter is set to "Browse" and that the filter values are blank.

[From site:] Order units [/sublibraries] were missing from USERB user account (in Staff Privileges). It now works.
