Description:

Are instructions missing missing for rep change 3007? Description: The filter "Invoice Number" and two columns - "Invoice Number" and "Invoice Vendor" have been added to the "Bulk Arrival" orders list in the Acquisition GUI module.

I've done what I need to do to <Bib library>/tab/pc_tab_col.lng:, but I get "Unable to find ID BulkArriv" message where the new filter is supposed to be. Unless I'm just missing the instruction, there's nothing telling me what to add to window.dat for the label for "Invoice Number."

Resolution:

The following line is missing from the "BulkArriveList.Static" section of the pc .\Acq\tab\lng>window.dat file:

```
BulkArriveList.Static.InvoiceNo #Invoice No.:
```

It needs to be added.

Also, if you don't have a line:

```
IndexTree.BulkArrive #[A] Bulk Arrival
```

in this same window.dat file, that should be added as well.
