
GUI Cataloging --Search --Browse Title info

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Description:

When we search in the GUI Cataloging --Search --Browse with a number (System Number, ISBN, etc.) as the "Headings List" choice in the dropdown, we get a display with three columns: "Doc#", "Index" and "Title". The Title column is incorrect. Where is this information coming from?

Resolution:

For a number (coming from the Z11), the pc_tab_col.eng PC_SEAR_SCAN_I values are used. (For regular Z01 headings, the PC_SEAR_SCAN columns are used.).

The Title info comes from the z13_title. If the info is incorrect, check the Z13 for that doc number in util f/4.
