Description:

I got the message "Section 75 for 75 was not found in tab_filing" (the section # may be 70, 71, 72, 73, or 74). These messages can appear in the util f/1/21 utility or in running p_union_02 or p_union_04.

What is the meaning of these messages and why do they appear?

Resolution:

The union_match_cdl_mo and union_match_cdl_se programs are hardcoded to look for these tab_filing sections. This error indicates that your tab_filing lacks them. You should copy them from the ./usm90/tab/tab_filing.

Aside from these p_union cases, the message "Section nn for xxx was not found in tab_filing" occurs when tab00.eng column 5 specifies a filing procedure which is not found in tab_filing (column 1).

Additional Information

union, tab_filing, p_union_02, p_union_04, tab00.eng
