

## Oracle 11 Release 2

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

Will Oracle 11 release 2 be supported by Aleph 20 within the next few months? One thing I saw about this version is that there is the ability to create a table without any space allocation. This would address some of the problems I've had with Aleph in the past where I don't create a table because I don't want to use the space, but then run into errors with Aleph because the table is not there and batch jobs throw errors. If we can get to this release and create placeholders for all tables without using space in the database.

### Resolution:

Oracle 11 release 2 is not planned for version 20

---

## Additional Information

11.2 11g
