
PDS in Endless Loop

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Description:

As long as I don't try to login to MetaLib, the system seems to work ok.
However, when I try to login to MetaLib, it launches into an endless loop.

The URL just keeps growing. Here is an example after a few iterations:

http://myuniversity.edu:8331/pds?func=sso&calling_system=metalib&institute=METALIB&url=http://myuniversity.edu:8331/V/15HXP6T7UMQNHJ6A8AHPGBJ9Y2BBGHFY48KYY1N82AVI53443R-35963?FUNC%3DQUICK%2D1%26amp%3BPDS%5FHAN

The www_server_m_4331.log shows the following entries:

Oracle error: io_z51_write

ORA-01653: unable to extend table M41_VIR01.Z51 by 128 in tablespace T

Oracle error: io_z15_write

ORA-01653: unable to extend table M41_VIR01.Z15 by 128 in tablespace T

Oracle error: io_z15_write

ORA-01653: unable to extend table M41_VIR01.Z15 by 128 in tablespace T

Oracle error: io_z15_write

ORA-01653: unable to extend table M41_VIR01.Z15 by 128 in tablespace T

Oracle error: io_z15_write

ORA-01653: unable to extend table M41_VIR01.Z15 by 128 in tablespace T

Oracle error: io_z15_write

ORA-01653: unable to extend table M41_VIR01.Z15 by 128 in tablespace T

Resolution:

This may be a problem with local table space.

Check the following:

- 1)UTIL x-8 is ran daily
- 2)There is free table space (using UTIL O-14-8)

Running UTIL-X-8 solved the problem.
