

## ILL2 Locate Preview Window Necessary ?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

The Locate function brings up a Locate preview. This is an unnecessary step for the user. How can we suppress this?

### Resolution:

The Locate Preview window can be suppressed by selecting in the menu:

Main Menu > Borrowing > Preview on Locate

Main Menu > Lending > Preview on Locate

It's an on/off toggle (check mark appears next to "Preview on Locate" when it is turned on).
