

## What is the z307 table?

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Question

What is the z307 table?

---

### Answer

The z307 is the patron update logger. Updates to the z303, z304, z305, and z308 are logged. It is a required table in the ADM library, new with version 21.

The Patron Record Log Changes Report (cir-27) service reads this table and produces a report of the updates.
