
How to start ue_21 automatically

Description:

I need to define ue_21 in the job_list.

We're running initial publishing jobs (on a daily basis) in the CR library. The jobs stop the ue_21 process and do not restart it. I've defined ue_21 in the job_list file:

```
W2 11:30:00 Y ABC30 util_e_21 ABC30,UE-21
```

but get an error:

```
aleph_ps: Command not found.
```

```
GNU Ghostscript 8.15: Unrecoverable error, exit code 1
```

```
if: Expression Syntax.
```

Resolution:

You can't add ue processes to the job list. The relevant ue processes are started by the unlock_library proc following the completion of a job which has locked the library.

The \$aleph_proc/unlock_library proc has the following lines:

```
set a = `echo $PUB_STARTUP_LIBS | grep -i $active_library`  
if ("a" == "") then  
  echo ""  
  echo "$active_library is not in PUB_STARTUP_LIBS"  
  echo ""  
  sleep 5  
else  
  source $aleph_proc/util_e_21  
endif
```

Thus, if the library is in the \$aleph_start.private PUB_STARTUP_LIBS list, ue_21 is restarted in the library when it is unlocked.

ABC01 and ABC30 need to be added to the PUB_STARTUP_LIBS line in aleph_start.private (and then do "source aleph_start").
