## ue\_01: Execution error : ../create\_z0101\_aut.gnt

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 15.2
- 

### Description:

ue\_01 keeps stopping. The \$data\_scratch/run\_e\_01.log has the following error message:

```
/exlibris1/15_2/u52_5/xxx01/tab/tab_aut.
```

```
Execution error : file '/exlibris/15_2/a52_5/aleph/exe/create_z0101_aut.gnt'.
```

```
error code: 114, pc=0, call=138, seg=0.
```

### Resolution:

This error can result from an incorrect Col. 3 in the \$data\_tab/tab\_aut:

1. In one case, the column was aligned incorrectly: there were two spaces between the "1" in col. 2 and the "MHI10" in col.3. (There should be only one.) Moving "MHI10" one character to the left and restarting ue\_01 corrected the problem.
2. In another case, column 3 had a bad library name, just "ATA ". Correcting it to "ATA10" and restarting ue\_01 corrected the problem.
3. In another case, column 3 was correctly formatted but the library did not exist in \$aleph\_libs.

---

## Additional Information

ue\_01, tab\_aut
