
WEBV:search by bib_id retrieves suppressed bibs

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.0
-

Description:

Bug Report Form for Issue 16384-11681

Module: WebVoyage

Release(s): reported in Unicode; replicated in 7.2.2

Server Platform(s) affected: Solaris/all

PC O/S (if this is PC specific): n/a

Browser type & version (if WebVoyage): n/a

Expected Results: A suppressed bib record should not be viewable in WebVoyage, regardless of the method used to retrieve results.

Actual Results: If you're searching your catalog using bib_id, you can retrieve suppressed bib records and save them to your account.

Workflow Implications: Patrons may be able to view data that staff have tried to prevent from making public.

Replication steps:

Suppress a record in Cataloging.

Do a search for the record by title – you'll get no hits.

Do a second search for the record by using the bib_id (<http://www.yourlibrary.edu:7008/vwebv/holdingsInfo?bibId=28456>)

This time you'll successfully retrieve the suppressed record.

Resolution:

Fixed in WebVoyage for 8.1.0.
