
Activation Wizard: 'Activate this package service' vs 'Make service available'

- **Article Type:** Q&A
 - **Product:** Alma
-

Question

On the Electronic Collection Activation Wizard, Package and Services Setup page -- what is the difference between "Activate this package service" and "Make service available"?

Answer

Both flags should be checked:

- * "Activate this package service" - a package can have more than one service; this checkbox enables to select the preferred service.
- * "Make service available" - indicates the availability of the package service (active/inactive).
