
create_z127: "Error writing to Z100 in:USR00"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

In the "POST UPGRADE ACTIONS IN THE COURSE READING LIBRARY" document I am at step 4 - running create_z127, but I have gotten errors (see below).

Not sure if this is related to the z100 errors I am getting when running clear_vir01 (see KB 16384-3313).

Oracle error: io_z100_write
ORA-00942: table or view does not exist

Error writing to Z100 in:USR00
Info: Empty table /tmp/utf_files/exlibris/aleph/u20_1/alephe/error_eng/p_file_04
Info: Empty table /tmp/utf_files/exlibris/aleph/u20_1/alephe/error_eng/p_global
creating utf version for file: /exlibris/aleph/a20_1/aleph/error_eng/p_file_04

...
...

Param Errors Found:
F01: Invalid or missing Oracle table name

Oracle error: update_cursor z100
ORA-00942: table or view does not exist

Error reading Z100 in usr_library
Z100-REC-KEY:000000004

Oracle error: update_cursor z100
ORA-00942: table or view does not exist

Error reading Z100 in usr_library
Z100-REC-KEY:000000004
Wrote Z100 record with rec-key: 000000004

Oracle error: update_cursor z100
ORA-00942: table or view does not exist

Error reading Z100 in usr_library
end
Param Initialization Failure, Exiting !!!

Our \$usr_library is ABC50

z100 is defined in abc50/file_list (see entries below) but is not defined in any other file_list. Should it be?
USR00 is a demo library.

u20_1/abc50/file_list:TAB z100 30M 0K TS2D
u20_1/abc50/file_list:IND z100_id 2M 0K TS2X
u20_1/abc50/file_list:IND z100_id1 2M 0K TS2X

Resolution:

[From site:] The addition of z100 in usr00 seems to have solved the problem - create_z127 now runs without errors, and I was able to proceed with the rest of the course reserves set up steps.
