

SQL query gives "table or view does not exist"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Why does this query get "table or view does not exist"?

```
> s+ abc01
```

```
SQL> SELECT /*+ DYNAMIC_SAMPLING(2) ALL_ROWS */z30_call_no, Z30_BARCODE, Z13_TITLE from ABC01.Z13,  
Z30, Z103 where ...
```

```
...
```

```
Error at line 1:
```

```
ORA-00942 : Table or view does not exist
```

Resolution:

This SQL assumes that you are in the abc50 library, but you have done "s+ abc01". You need to do "s+ abc50" instead.
