

z303 note field duplicated in z305

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

When one creates a new Patron in the Circ Gui and adds a note in the global ./z303-field-2, it is also re-created in the borrower ./library-note-2 (Local Note 2).

This information then appears in duplicate in the user-details screen.

Is this normal? Is there any way to prevent the z303 from being also entered in the library-note-2?

Resolution:

The pc_cir_c0468 Fast Patron Registration program unconditionally moves the C0468-FIELD-1 to both the Z303 (Global) FIELD-1 and the Z305 (Local) FIELD-1.

Any change to this behavior would be an enhancement request.

The regular, non-Fast patron creation program populates the Global note only. See KB 16384-29522 for a comparison of the Fast vs. regular forms.
