## p\_manage\_nn: "Exiting due to job suspension"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
- 

### Description:

Sometimes a p\_manage\_nn job (such as, p\_manage\_01, p\_manage\_02, etc.) stops with the message: "Exiting due to job suspension".

How do I find out why it stopped?

### Resolution:

This message is issued when a critical error is encountered. You need to look at the \$data\_scratch/p\_manage\_nn.err file to see exactly what the error is.

The diagnosis of "Exiting due to job suspension" problems is discussed in Appendix F of the "How To Run Index Jobs" document (attached below).
