
18-19 Upgrade: table z07p does not exist in abc00

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

We see the following error in step 1010 of the 18-19 Upgrade Express:

```
A_ERROR: cannot find data in file_list in abc00
```

```
...
```

```
A_ERROR: The table z07p does not exist in abc00.
```

```
...
```

```
aleph_admin@ALEPH20> DROP SEQUENCE ABC00.last_publish_seq
```

```
ERROR at line 1:
```

```
ORA-02289: sequence does not exist
```

Resolution:

z00p is the Aleph Published documents table. Looking at the file_list templates in \$aleph_root/tab, I find that the libraries which have a z00p table are the BIB, AUTHORITY, and COURSE libraries.

abc00, which is a pw_ and usr_library and (correctly) has file_list_type NONE in its prof_library, doesn't need one.

This error can and should be ignored for abc00.
