
WebV: Records Per Page variable not retained

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.1
-

Description:

Bug Report Form for Issue 16384-10817

Module(s): WebVoy?ge

Server platform(s) affected: Tested on Solaris

PC OS (if applicable): N/A

Browser & version (if applicable): All Supported Browsers

Release(s) replicated in: 7.2.1, 7.1.0, 7.0.1

Last version without bug (if applicable): 6.5.4

Expected results:

When setting the 'records for page' variable in a search, the number set would be used for the remainder of the session.

Actual results:

When viewing a headings list as a result of a redirect link, the titles list of said heading will always display 10 records per page.

Workflow implications: Minor display issue

Replication steps:

1. From the Basic Search page, run a title search for "huckleberry finn" and set the "records per page" to 20 or 25.
2. Click on any record by Twain, Mark
3. On the record display page, click the link for Twain, Mark to start a NAME headings search
4. The results for step 3 should be one heading for Mark Twain, click on it
5. The list brought up is only displaying 10 records per page

Resolution:

Fixed in WebVoyage for 8.1.1.
