

ACQ/EDI:free text segment adds brackets, 1: to Notes tab

- **Product:** Voyager
 - **Product Version:** 7.2.1
-

Symptoms

If an EDI invoice header contains an FTX segment with free text, the free text is added to the Notes tab on the invoice; however, it's surrounded by [1:].

Defect Status

Issue 16384-13473/VYG-4501 is currently in Development.

Replication Steps

1. Put an EDI invoice with an FTX segment (FTX+INV+++Your free text') in /m1/voyager/yyydb/edi/incoming.
 2. In Acquisitions>EDI>Process EDI Messages>Incoming, click Receive a File and select your file.
 3. Highlight your message and click Load.
 4. Click in the Message Type field to get the ellipsis button, then click it to bring up the Invoice.
 5. Go to the Notes tab on the Invoice – you'll see [1: Your free text] instead of just Your free text.
