## p\_acq\_14: changing default for "Update database" to "Y"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
- 

### Description:

In submitting p\_acq\_14, we want the default for "Update database" to be "Y" rather than "N". How do we do this?

### Resolution:

The distributed ./a20\_1/aleph/pc\_b\_eng/p-acq-14.xml has the following lines:

```
<label>Update Database</label>  
<source>explicit</source>  
<default>N</default>
```

you need to change this last line to:

```
<default>Y</default>
```

and save the file as ./u20\_1/alephe/pc\_b\_eng/p-acq-14.xml .

Local customization of pc\_b\_eng files is described in the article "[Customization of pc\\_b\\_eng and error\\_eng files in version 17-up \\*\\*MASTER RECORD\\*\\*](#)" (KB 8192-824)

Note: you could update the ./a20\_1/aleph/pc\_b\_eng/p-acq-14.xml but you risk the updated file being overlaid by a Service Pack.
