

## Cron utility to export e-journals to MetaLib

- **Article Type:** General
  - **Product:** SFX
  - **Product Version:** 3
- 

### Description:

Is it possible to configure the regular export of e-journals from SFX to MetaLib as a cronjob?

### Resolution:

It is not possible to set the export of e-journal records from MetaLib as a cronjob whether you are doing the job manually or using the Util N-1 script.

In Version 4 of MetaLib, e-journals will no longer be loaded to MetaLib, so this maintenance problem does not continue after the migration to that version.
