

## Serials check-in notes don't always appear in Arrival Form

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

In Serials, the check-in notes from the subscription record are supposed to appear in the first box of the Arrival Form (ACQ > left pane Serial tab > [K] Check In node > lower right pane 2. Arrival Form tab > Check-in Note field).

They don't always. Their content is important to staff.

### Resolution:

When there is no Prediction Pattern, no 853, and no 853X and a manually created Issue needs to display the Subscription record Check-in Note, the Issue and the Subscription need to be associated with each other via the Subscription No. field (ACQ > left pane Serial tab > [M] Item List node > right lower pane 4. Serial Information tab > Subscription No. field). This is done by clicking on the field's drop-down arrow and selecting the relevant Subscription No.

This connection can be added after the Issue is created in the [K] Check in node or by creating it from the [M] Item List node.
