## ue\_01: "Load: missing paragraph : 245 in library: ABC01"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 17.01
- 

### Description:

All the entries in the ue\_01 log suddenly contain the following errors:

Load: /tmp/utf\_files/exlibris/aleph/u17\_1/abc01/tab/edit\_paragraph.eng

### Resolution:

This message is occurring because of this line in ./abc01/tab/tab22:

```
TITLE 2 245## a 245## b 245## c 245## f 245## n
```

This is not how to include these 245 subfields in a z13 TITLE field.

What you need to do is:

1) change the tab22 entry to look like this:

```
TITLE 2 245
```

2) add this line to edit\_paragraph.eng:

```
245 245## D
```

(The effect of this will be that the edit\_field.eng entry 245, edit\_field ID "D" -- which includes the subfields that you want -- will be used.)

3) stop util e/2 (to stop ue\_01), then util e/1 (to start it).
