## Loan hangs: "Processing request. Please wait."

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 17.01

---

### Description:

The GUI Circulation is hanging during online and offline circulation. We see the message "Processing request. Please wait." in the lower left corner, but nothing ever happens.

### Resolution:

The pc\_server\_6991.log has this message:

Oracle error: io\_z34\_write  
ORA-01653: unable to extend table PWD00.Z34 by 16 in tablespace TS1D

and hundreds of these:

Oracle error: io\_z31\_write  
ORA-01653: unable to extend table ABC50.Z31 by 16 in tablespace TS1D

and util o/14/1 has this:

```
TABSPACE_WITHOUT_FREE_SPACE
```

```
-----  
UNDOTS  
TS1D
```

Datafiles need to be added to both of these tablespaces. This can be done using util o/13/3 or directly in Oracle.
