## 785 field performing bad ISSN search instead of TTL

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

There has been an ongoing problem with records that contain a 780##/785## field. When I click on the link of field Continued by (field 785) in the full view (func=service&service=TAG for 785 field), it unexpectedly does ISSN search. Isn't something wrong??

### Resolution:

The Continued by Field is field 785:

edit\_doc\_999.eng:

## 78500 D LContinued by Y Z eng E W

tab11\_acc has defined ACC index on field 785 as:

785## TTL ckst

But col. 3 in tab\_service is empty:

7#### www\_f\_service\_scan\_acc

You need to change tab\_service from

7#### www\_f\_service\_scan\_acc

to

7#### www\_f\_service\_scan\_acc TTL

Then restart web server.
