
Config file for Util-S-4: Monitoring Tool, change e-mail, etc.

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Description:

I can't find out how to change the e-mail address for UTIL-S-4.

The ML4 Sys Admin guide says to see this document: "MetaLib Version 4.0.x - Monitoring Tool" but can't find the above document anywhere.

Resolution:

In section 2.3, the config file is edited via option 1 in the monitoring tool menu:

MetaLib Monitoring Tool

0. Exit
1. Edit configuration file
2. Run all checks
3. Run a specific check
4. Oracle report

Metilib Version 4.0x Monitoring Tool documentation is currently not available from the DocPortal (as of April 2008).

In the meantime there is an updated [January 2008] version attached to this KB item.

The updates do not include any functionality changes (the changes are mostly links to updated names of documentation files).

Please check the Documentaiton Portal periodically as we anticipate an update being made available in the near future.
