

## repackaging error

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

I made some changes to some of the Hebrew files in the GUI, and then repackaged it. I got the following error:

```
Building alephcom during STEP2" Could Not Find C:;\p\wrk;hcom\tab\stationid.dat
```

What do I do??

### Resolution:

No need to worry about this.

While building the new GUI it looks for this file to delete. The above message simply means that the file did not exist (which is acceptable).

See also, 16384-1987.

---

## Additional Information

Hebrew, GUI, package
