Question

Can DigiTool files be customized (HTML, JSP, JavaScript, etc...) ?

Answer

These files can be customized, however note these important issues:

- 1) Ex Libris will not support any issue that will be raised because of this change
 - 2) It is the customer's responsibility to maintain these changes
 - 3) New service packs can override local changes
 - 4) It is the customer's responsibility to integrate new changes that were added by service packs and relevant to the modified files.
