

Error message in log for p_file_01

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

We're getting the following in the log for p_file_01:

```
I/O error : file 'TP1'  
error code: 3/5 (ANS85), pc=0, call=1, seg=0  
13 File not found
```

logfile is: /exlibris/aleph/u19_1/alephe/scratch/abc01_p_file_01.05764

We have checked and the file was there, the "Print to ADM" was not checked, and the filename was only 12 characters.

What else can cause this?

Resolution:

You have submitted this service with the MARC Record Format set to 2048 byte Fixed blocks. This is an old format that was primarily used for blocking MARC records on magnetic tape. I think all electronic files in MARC Communications Format now use X'1D' to as a record delimiter. If you use this when submitting p_file_01, this problem will clear up.
