
SFX button on the Holdings Detail / Items page

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

It was my understanding that the SFX button on the Items page of the OPAC was unconditional, but it seems Aleph only provides it under certain circumstances. What are the conditions that Aleph requires in order to display the SFX button on the Items page?

More specifically, the SFX button is not being provided for items with Format = BK, even though I have nothing in tab_sfx_denied.

Resolution:

The SFX button (in the items/holding page in OPAC) is present only for journals which exist in the SFX MySQL table called: journal_subscriptions.

The program is intentionally set up this way.

The documentation is being updated to indicate this.
