## How does Circjob 38 impact CIRC\_TRANS\_ARCHIVE?

- **Product:** Voyager
- 

### Question

How does Circjob 38 update CIRC\_TRANS\_ARCHIVE table?

### Answer

Circjob 38 changes the patron\_id to 0 for any transaction associated with a particular ITEM\_ID from the CIRC\_TRANS\_ARCHIVE table for any rows beyond the number specified when you run the job. The job retains N rows for the most recent transactions associated with an item, where N is the number specified when the job is run.

All non-patron related information for these transactions is retained.
