
Turn off ue_08 and ue_11 (ELIB)

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

Turn off the ue_08 and ue_11 for the Authorities databases

How can I check, whether the ue_11 is required?

Procedure:

1) For ue_08

```
change $alephe_root/aleph_startup.private
setenv ACC_AUT_STARTUP_LIBS "ABC01"
to
setenv ACC_AUT_STARTUP_LIBS ""
```

2) For z105 (ue_11) please update \$alephe_root/aleph_startup.private

```
setenv MESSAGE_STARTUP_LIBS "$z105_library"
to
setenv MESSAGE_STARTUP_LIBS ""
```

3) In order to check, whether there are any updates handled by ue_11 please consult the \$data_tab/tab_z105 tables.

Example

```
./abc10/tab/tab_z105
```

```
! 1 2 3 4 5 6 7 8 9 10 11 12
!!!!!!!!!!!!!!-!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!
UPDATE-DOC 4 ABC01 ABC02
```

! 4 = update of bibliographic z01 record because of authority
! database record update

Additional Information

NOTE 1:

Before you deactivate the ue_11 process, please check the configuration as described in section 3) below.

NOTE 2:

Please either run aleph_shutdown first or stop the currently active ue_11 and ue_08 processes via the util menu.
