

Run both ARC ETL and p_file_20

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Can we run the ARC ETL (incremental with all tables) and p-file-20 (patron loading) at the same time on our Aleph machine? Or should we separate these two processes?

We also run "clear vir01" at that time. Could you please also clarify the potential conflicts of running "clear vir01" with the ETL?

Resolution:

p_file_20 updates some of the same files that p_arc_01 is extracting, so I think it is better not to run them at the same time.

clear_vir01 does not update any of the same files, so it can be run at the same time (but, as described in KB 8192-482, it should be run during a time of low activity).
