

Course info in regular catalog

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Desired Outcome Goal:

Is there any way to expand CNO information from ABC30 back to the linked ABC01 bib record so I can display the course info in the regular OPAC?

Procedure:

1. Use the GUI Circ -> Items -> Change Item Information to insert the Course Number as the Call No.
2. Later, use GUI Circ -> Items -> Restore Item Information to return it to the original.

Category: Course reading (500)
