
Print Daemon Failure after v18 Service Pack 1411

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We just installed v18 Service Pack 1411(January, 2008). Our print daemon is crashing every time it encounters a file that needs to be emailed. The Windows error is pointing to printd.exe.

I copied the older version of printd.exe into [C:\AL500\ALEPHCOM\BIN](#) and the print daemon processed the job correctly.

Resolution:

Please download Printd.zip from the Doc portal.

The Printd.zip is under:

Download Center -> Service Packs -> 18.01

Unzip the file and:

On a single PC, please place the printd.exe file in path: `.\Alephcom\bin`

For distribution of the fix to all PCs in your library, please put the file on the server, under the following directory, depending on your practice:

`$aleph_dev/aleph/pc_exe/version/alephcom/bin/`

or:

`$aleph_dev/aleph/pc_exe/sp_exe/alephcom/bin/ .`
