

Item history tab, item status code

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Desired Outcome Goal:

Item history tab, View: In Aleph 20 for item status only the code is provided, in Aleph 21 the description of the item status. How to provide in Aleph 21 also only the code of the item status?

Procedure:

In Aleph 20, directory xxx50/pc_display_Ing you'll find an additional file item-history-expand.trn which handles translation of item status and sublibrary. This table is missing on Aleph 21 server. Please add it there.
