

## Missing error message while trying to add sublibrary to budget

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

When I try to add a new sub library to a budget, and get the following message "Error 0212 Not defined in file pc\_com\_c0145." This message is not in our a-tree error\_eng. Can you please tell me what this error message is supposed to contain?

### Resolution:

The 0212 error occurs when one of the sub-libraries currently checked for the budget has been removed from the system configuration (that is, from tab\_sub\_library). If you uncheck the invalid sub-library, you will be able to add other new ones.
