
Circulation Logging Not Working.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We are suddenly not seeing any activity being logged in the Circulation module.

And we are not seeing any log under the "Z" Circulation Activity node in the Patron Tab or Item tabs.

Resolution:

The z309 circulation log resides in the TS2D tablespace (and its Oracle index is in the TS2X tablespace).

I see the following (in util o/14/1):

```
TABLESPACE_WITHOUT_FREE_SPACE
```

```
-----  
TS2X
```

This should be addressed immediately -- by adding files to this tablespace.

After doing this, you should rebuild the z309 Oracle indexes and other affected Oracle indexes, using util a/17/3.
