Description:

IE7 [Internet Explorer, version 7] is failing to display item information in Reserves. FireFox displays the same pages without error.

Go here: <http://abc.edu:8991/F?func=find-b-0>,

Select the Reserves base at the top of the page, then search for 'title begins with' Catch-22.

For any of the records that are found, click 'all items'.

Resolution:

[From site:] The error was some Javascript on the page that manipulates the attributes of Request links. It was running unconditionally, but no Request link was being provided to the page in the case of Reserves (and also some other situations). The fix was to make the Javascript conditional on the presence of a Request Link.
